

St John's C of E Primary School, Maidstone.

Science Vision Statement:

Our aim is for children to gain a deeper understanding and appreciation of the world around them. We hope to develop their curiosity through first-hand experience of the natural world and develop a greater awareness of their responsibility as a member of the human race, to do all they can to protect this for future generations. We encourage children to ask questions, make accurate observations and work to develop the scientific skills that might help them to find some of the answers that they seek.

At St John's, Science is one of our core subjects and of great importance as a key part of our diverse and varied curriculum. Knowledge and skills are taught in a way that ensures progression across the school. Our aim is to develop scientific thinking for all and to start the scientists of the future on the first steps to wherever their lives might take them.
